HOW THE CATWALK INFLUENCES THE WAY WE LIVE

LUXE LEATHER The head-to-toe leather look on the runways has its interiors equivalent in unexpected use of the material. Leather-clad lighting, wraparound leather 'jackets' on glassware (courtesy of über-cool designer Simon Hasan) and leather upholstery that covers an entire chair – legs and all, not just the seat – are among the best manifestations of the trend. Follow the natural look of the skin or opt for a dyed finish: tan, chocolate and oxblood are key colours, as is classic black.
